### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The closest prior art is Gerson (US 3,533,600). Regarding independent claim 22, Gerson ('600) does not disclose "means for actuating the speed switching means in response to a first mechanical input" which are disclose as corresponding structure in the instant specification or equivalents thereof for the purpose of section 112 sixth paragraph. Applicant states in remarks filed 15 July 2003 that corresponding structure for actuating the speed switching means in response to a first mechanical input is "slider 102 and its associated parts including the pin 104". Gerson ('600) does not disclose such structure or equivalents thereto for actuating the speed switch means. The prior art does not render such means obvious in combination with the remaining limitations of independent claim 22. Regarding independent claim 30, Gerson (600) does not disclose the limitation "all the electrical connections between the two mains terminals and the speed switching means and the start means being realized on the module" in combination with the limitation "said ... motor do[es] not form part of said module", because in Gerson ('600) the speed switch (108, 110) and the other switch (119,120) are connected electrically through the motor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
